ITEMS OF GENERAL INTEREST. Chinese Restriction in Australia. It seems, as Mr. Wisker tells the story in the Fortnightly, that Australia has been exposed to the trouble of three kinds of colored people—the aboriginal, who is black, the Polynesian, who is of any tint from copper to black, and the yellow Chinaman. Her father, Josiah Moyle, a bill discounter of Lombard street, was a new man of the city plutocracy—one of those financiers who have made such rapid

Mr. Moyle had a trick when agitated of grasping his nose with the whole of his hand, and working it up and down as if it were made of India-rubber which he wished to elongate. His nasal organ underwent a deal of pulling in the brief interval that elapsed before he and Lord Beauvray were closeted together. These were the handsome, however, and not devoid of who considered Miss Moyle a lucky girl, whilst old Moyle, with a series of wheezes like moans, ruefully examined the cient family, young, immensely wealthy and well-looking, but he was popular everywhere owing to his sunny temper all the papers in his hand with a feverall the papers in his hand with a fever-ish grasp, and looked at Lord Beauvray. There was an expression in his dull eyes as of a light behind an unclean

pane of glass; 'I say,' he whispered, 'have you told anybody besides me about this secret?' 'No; I came to you first, as in duty bound.'

'Then what prevents us from destroying these papers? I shan't say anything about it. That young Timburel is a skunk and a snob; it will be ridiculous to see him a lord, and he'll ruin himself,

'I shall,' answered Lord Beauvray, quietly; and held out his hand for the papers.

For this purpose he placed the amazed and elated Mr. Timwas decidedly a snob; Eord Beauvray could not like him, much as he forced himself to be friendly, and he was soon forced to reflect with a sigh that the house of De Vray would be poorly rep-

resented by its new chief. Of course, George de Vray's marriage was postponed. The turn in his for-tunes had thrown so much business on his hands that it was impossible he could devote a month to honeymooning unt l it was all disposed of; besides which, he felt bound to make Mr. Moyle the offer of releasing his daughter from her engagement. At first this proposal was pooh-poohed equally by the bill-discounter and Miss Moyle herself.— Millie, who was not quite so sensible as Millie, who was not quite so sensible as she was pretty, wept a good deal at not becoming a countese; then she wept at the nobility of George's action, which everybody was praising. In fact, during a week or two she bedewed a great many pocket-handkerchiefs with her weepings over one thing and another.—But, in the main, she was disposed to remain faithful to George, and took some credit to herself for her fortitude.

Now, there was staving in the house

I find that I have a local side to the said that I ha will not beat about the bush. I find that I have no legal right to the title which I bear, or to the fortune which I am using.'

'Eh! what?' exclaimed Mr. Moyle, with a gasp.

'I made the discovery this morning on rummaging through a box of deeds,' continuing the property of the proper rummaging through a box of deeds,' continued Lord Beauvray, whose voice grew steadier. This lamentable prospect caused Millie's tears to burst out afresh, peevishly, so that she flew at Gertie when the latter happened to make some remark in George's praise. Mr. Moyle also scolded his niece, and very roundly, saying she was a silly girl to think that there was anything grand in throwing one's money out of the window, so that all the world might talk about it. Poor Gertie held her tongue, though her heart throbbed woefully,-She had heard that the new Lord Beauvray, the ex Mr. Timburel, had been invited to dinner for that evening; and she began to suspect that her precious

Her intuition was not at fault. Old Moyle had hastened to make peace with his discharged clerk; and the latter, whose vanity was tickled by seeing his quondam tyrant cringe before him, gradually became a regular guest at the bill-discounter's, though he took care never to come at times when he was likely to meet George there. 'I think it rather strange,' remarked Girty, one day, 'that Lord Beauvray should not have discovered this secret until he had enjoyed the property several years. It looks much to me as if some other people had discovered it, too, and as if he had only acted under compul-

'Oh, Millie, you are casting an aspersion on one of the most noble acts I have ever heard of!' exclaimed Gertie,

quivering all over.

'Well, it's your fault,' screamed Millie, exasperated. 'I am sick of hearing you always harp on the same string. If you are so fond of Mr. De Vray, why don't you get him to marry you? That would be two beggars together!'

Naturally, Gertie went to her room to came very circumspect in her demeanor toward him. When he called to see Millie she left the room. George soon with Mr. Moyle's daughter were growing more and more irksome by reason of Millie's coldness and irritability. At the least thing she would snap and sulk: and one afternoon, when George inno-cently made some inquiry about Miss off in the drawing-room whenever visit-ors come. don't consider poverty a disgrace, either. 'No; but it's very inconvenient,' said Millie, still querulously, 'and that reminds me: if we marry, I suppose you don't mean to live on my money? Papa-says his banks might break, and all sorts of things. So I suppose you will do something to get an independent in-

come?' 'Yes,' answered George, coloring deeply; 'I have applied for an exchange into the line, and think of going out to the war on the Indian frontier. I shall have lieutenant-colonel's rank; so if you will wait for me two years, Mellie, I may return with a new career and perhaps an income before me.'

'Oh, wait two years to become a soldier's wife and go out to live in baking Indian heat!' exclaimed Millie, pouting.

Miss Moyle that I am going off to the war in India, 'You are going to the war! Oh, Mr. De Vray-if anything should happen to youl' exclaimed Gertie; and tears started to her eyes. 'Thank you for those tears,' said

That evening, when old Mr. Moyle was apprised of what had happened, he rubbed his nose and said: 'Well, well, it's he who has broken off the match; tot we. I suppose we've heard the last of him now, for he'll go out to India

and stay there.'
One year had passed. There had been a triumph of the British arms in India, and the name of Col. De Vray fuss and is glad of it, she thought her cousin happy amongst all girls, and in everybody's mouth. The new Lord Beauvray was not present.

At last, when a toast had been drank to George's honor and Millie's happiness, honest Mr. Moyle acting as toas master, the general drew a parcel and extracted from it Gertie's book-marker. Insects in a Boy's Ear. A young lad of Midaletown, N. Y. has had an unpleasant experience with one of his ears. While in the country an insect of some kind entered his ear, and, after buzzing there a moment, came out again. He thought no more of it until toward evening yesterday, when his ear began to pain him. The pain grew more intense, and he was com-pelled to walk the floor all night. Next morning he went to Dr. Pillsbury, who examined the ear and found it full of maggots. The insect while in the ear had deposited its eggs, which had hatched within twenty-four hours. At the end of thirty-six hours they had grown to the length of an eighth of an inch. The doctor tried to kill the larve and wash them out by injecting carbolic acid with a syringe, but failed utterly, and he had to use an instrument to remove them. He extracted from twenty-five to thirty of the crawling ittlethings which had lodged against the drum of the ear. The lad experienced a great feeling of relief when the job was finished; but not all were removed then, and another operation will be necessary.

There is a curious fact connected with the Santa Fe river that is not generally known. The river in some places sinks apparently entirely under ground and rises again abruptly. Mojor Mike Whetstone, well known in that section and at the Keys, once bethought him that he would build a mill, and proceeded to carry out his design. The mill was built, when lo! and behold, the river that they would be a mild and proceeded. Nearly half of his arm was drawn between the rollers before his terrible situation was discovered and the machinery stopped. Before the boy could be removed a messenger had to be dispatched to the machine shop, some distance away, for machinists to take the machinery spart. This required more than fifteen minutes. All this time the lad bung suspended by the crushed hand and arm, the flesh being entirely torn away, exposing the bones and cords. The little fellow never uttered a cry or shed a tear. His father an employee on the pier, was a weeping witness of the terrible scene, and the boy kept saying, 'Don't cry, father; they'll get me out all right.' The lad's arm will have to be amputated at the elbow.

Surveys already made demonstrate the fact that the immense sand-storms which were said to prevail there, and which were depicted in school books as overwhelming whole caravans of travelers, have no existence. No doubt, in the absence of moisture, dust is blown about by the wind much more than it would te in a country visited by frequent rains; but the soil of the Sahara is in no way different from that of Europe, except that, not disagreeable experience of cheap ferent from that of Europe, except that not disagreeable experience of cheap it is drier, and hence it could hardly be labor and small industries, there was a carried, as sand might, by the wind, in reaction, and resolute hostility ended in repressive legislation such as California seeks. The Chinaman was required to pay £3 for a miner's license, when the ordinary fee is ten shillings; and £10 for a business license, while Europeans pay but £4. This was followed by a regulation that the master of every vessel bringing Chinese passengers should deposit with the collector £10 estimate, and that the people are peaceful and industrious. The Everhart pearl, found near Waynesville, was sold for \$2 800. The season lasts from June to October, and about fifty men and boys are constantly engaged in the work, each on his own account. Pearl-making is evidently no new habit of the Miami mussels, for many Indian mounds have with the work he has to do. In the 'Life of Charles Lever,' just published, occurs this pleasant paragraph about the bright novelist: To judge from the exploits of Lorrequer and O Malley in the field of firstation, Lever might well be supposed to have had considerable experience and sptitude as a Lothario; but his companion from youth, Major D—, assures us that this was in reality not the case, for, although delighting in female society, he seems to have never had but one real love affair—the one which began in his boyhood, and ended only with his life.' Lever read all his novels to his wife, and she pruned as she pleased. From the day she died he felt that his right hand had lost its cunning; and in dedicating 'Lord Kilgobbin' to her memory, he declares that it must be his last.

GRANT.—Considerable speculation has been indulged in for some time, as to of the attorney's claim, with the promwho would be the candidates for the se that the remaining \$3,250 would be next Presidency. Recently it was stated that Grant would not be a candidate under any circumstances. Now it is qualified with an "If," thus, according to a more recent letter received; "Still. if it should happen, at any time, that the Republican party should need him for any purpose, he would not fail them."

THE MT. AIRY RAILROAD. - The Visitor complains that there are only about 50 hands at work on that end of the road, and says: "What is the matter? Is it not strange that such a poor show is made for this end? Nearly one year gone since the legislature adjourned. We ought to have at this moment 200 hands busy with all energy throwing dirt, so that the next legislature could not afford to ignore continued supplies for convicts, as she showed she could not afford to do in the case of the end south of Greensboro."

Business .- According to the newspapers North, the future business outlook is assuming a brighter aspect. In England, however, it seems to be gloomy enough, large failures of business houses being recorded. Here is the latest :

Another old iron and plate establishment at Cardiff, England, has been closed; six thousand people are thrown out of employment and are destitute. Large sums of gold are being shipped from England to meet the American demand. More reduction in wages is to follow in Staffordshire which will affect

50,000 employees.
Within two days 960 immigrants have landed at New York, and 750 are expected this week.

ACCIDENTS.-A stage was upset near Mr. Fortune's plantation, about 12 miles from Henry's, injuring several passengers, but none seriously, except one who had his shoulder dislecated.

As an excursion train was returning to Salisbury the other evening, a man named Hall Neely, said to belong to Davie county, fell off the train and was terribly mangled. He fell asleep and a slight lurch threw him off and the car passed over him, cutting off his left arm at the shoulder, badly cutting his side, and making a fearful wound in his head, crushing the skull, allowing some of the brain to exude.

. Mr. P. H. Neely, we learn from the Salisbury Daily News, died Saturday evening, and his remains were taken to his home in Davie for interment.

INJUNCTION. - The Commissioners of Davie have been enjoined from levying the tax voted to the Mooresville and Winston railroad. It is whispered hereabouts that the cause of these enjoinders are to be found in the fact that the legislature that chartered the North Carolina Railroad Company stipulated that no road shall be allowed to run parallel with it within 25 miles. If this is true, we suppose the injunctions will hold good. But such enactments are a disgrace to a State and retard the wheels of progress .- Salisbury News.

SHEEP .- We have frequently alluded to the profits of sheep raising, if proporly conducted. Some tried the experiment, and pronounced it a failure. But we are inclined to the opinion that if old pine fields and other wood lands were enclosed for pasture, sheep raising could be made profitable in this country, and those old fields, &c., utilized in that way. The experiment has been tried in Guilford and other counties, and proved

Too many dogs, may be cited as one of the drawbacks, but there is a remedy for that. If the Legislature is afraid to tax dogs, let every farmer act in selfdefence, and worthless or sheep-killing dogs could soon be thinned out or ex-

terminated. Here is the latest sheep article, com-

piled by the Wilmington Star : "Texas is a very great sheep State. We see it estimated that there are now not less than 5,000,000 sheep-more than there are in any of the States save California, which has about 8,000,000. Ohio is the third in size, ranging at 4,500,000. It is stated that Texas actually shipped 11,000,090 pounds of wool last year, besides large quantities that were manufactured in the State. There is furthermore stoady increase. We copy these figures to encourage North Carolina. With a State, a large part of which is especially adapted to sheep husbandry, but comparatively little is doing. The energies and resources of the people appear to be exhausted in raising dogs."

The acting President under the threat of another exposure of the peculiar cussedness of Louisiana politics in 1876, promptly shelled out a thousand dollars as his quota of the thirty pieces of silver which it was agreed should be paid to the returning boarders for their infamy. HOW THE WOMEN WERE SAVED AT BEAUFORT.-A Beaufort (N. C.) correspondent of the New York Herald furn-ishes an account of the saving of the female guests of the Atlantic Hotelin that town, which was entirely destroyed by the recent great storm. At 5 o'clock in the morning the guests commenced to leave the doomed building, and at that time the bridge connecting the hotel with the billiard-room was a wreck, the waves beating from two to three feet above the walk. The male guests, with the help of the good citizens of the town, secured the walk with ropes and commenced to save the women. The first lady to be carried was Miss Gales, of Raleigh, N. C. daughter of the late Seaton Gales, about thirteen years old. Two gentlemen would take charge of a lady, and together they would-under the most perilous circumstances, the wind blowing a gale and the waves dashing with the utmest fury against them-make their way to the billiard saloon, and then the ladies would go through to be received at the northern door by two more gentlemen, who were up to their waists in water, and thence hey would be taken to terra firma. Nearly three-fourths of the guests were either ladies or children. The children were nearly all saved by a colored boat-man named James Davis, and Jim tells with great gusto that Gov. Jarvis has promished that he shall never go to the penitentiary as long as he is Governor. There is not a relic of the building left except the remains of one chimney, and that is not three feet above the ground.

His Birthplace and Early Life—His Sub-sequent Military and Political Career, and His Kinspeople, Living and Dead —A Letter to a North Carolina Lady.

ROSEBURG, OREGON. July 17, 1879. DEAR MADAM :- Your letter of the 21st ult, has been received. I thank you for it, and would have answered ere this, but for a press of business that could not

be delayed. I am the grandson of Jesse Lane, one of the three brothers mentioned in your letter, who lived near where Raleigh now stands. The three brothers were born near where they lived, away back in Colonial times; were clever, intelligent, old-style gentlemen, and did good service in the war of the Revolution. My father, John Lane, entered the army while quite young, just in time to be in the battle of King's Mountain, and remained in the army until the surrender of Cornwallis at Yorktown. He voted for George Washington the second term, North Carolina having adopted the con-stitution after his first election; he then voted for John Adams' first and only term, then for Jefferson two terms, then

My first battle, Buena Vista, was under Taylor, then transferred to Scott's line, and saw and helped to fight as many, if not more battles than any officer of that war. Very soon after peace was made with Mexico, I was, by Mr Polk, then President, appointed Governor of Oregon Territory and ex-officio Superintendent of Indian affairs. The trip to reach my post of duty had to be made across the plains in the winter, a feat that had not before then been accomplished. But I had at the request of Mr. Polk undertaken the journey, and with hurried preparations an escort of twenty men, under Lieut. Hawkins. left Fort Leavenworth on the 10th day of September, 1848, and after a hard struggle arrived at Oregon City on the 2d day of March, 1849, and on that day issued a proclamation making known that the laws of the United States by act of Congress had been extended over the territory of Oregon; that I had been duly elected Governor, had taken the oath of office and had entered upon the duties thereof. seeing you. Of my grandfather's family there were eight sons and eight daughters. My aunts married gentlemen named re-spectively as follows: Rhoda was mar-ried to Rakestraw, Patience to John Hart, Rebecca to Luckey, Salie and Polly to brothers named Kirkpatrick, Winnifred to Rogers, Elizabeth to Parson Montgomery, and your grandmother, Carrie, married David Lowry. My father, and uncle John Hart, Matt Barber and one other gentlenma, whose name I forget, and Uncle Lowry, were in pursuit of Indians who had been stenling and robbing the outside set-tlers, and—all five were good Indian fighters-venturing too far were attacked by a large party of warriors. My grandfather moved from Georgia to Illinois when he was eighty-four years of age, and killed many buffaloes in that then, new and uninhabited country.

He died at eighty-eight.

I know but little of the whereabouts of many of my cousins. They are scattered over the Southern States.

George Copely, at Durham, lost his life by the gasses in a well into which he had descended. The Recorder says — Young Copley volunteered, and went down in the bucket, which he had half filled with the fragments of rock when he called out to be drawn up. His father and the negro pulled on the rope, but when less than half way up. George fell to the bottom. His father was held back with great difficulty from going down immediately; but being tied fast to the bucket, he made the descent. He soon called to be drawn up, and when he reached the surface was speechless and helpless from the foul gasses. The body of George was not long afterwards recovered, and was interred on Thursday. Take warning.

MORMON PREACHERS THRASHED. - We mentioned last week that there were two Mormons at work in Cherokee county. We learn that they succeeded in making several converts, when the people quite handsomely tickled the preachers with hickory twigs, inducing them to leave the country in haste. Not content with this, the citizens thought it advisable to "tickle" the converts also. One fellow complains that the tickling was done while he only had his shirt to protect him. The "converts,". some thirty in number, including several females-indeed, a majority of the converts are in women-have sold their goods and chattels and are about moving to Utah.

A CHAIN-GANG IN MECKLENBURG .-The Board of County Commissioners and W. A. Washam. The gang have been at work on the new road beyond Phifer's pond. The number will doubtless be increased almost daily, as it is the intention of the Board to add to it all the prisoners who may be sent to the county jail. The expense of working the gang is about \$60 per month. The work of ten men, at the usual price of labor-50 cents per day-would be \$150, so it will be seen that the gang may be made profitable to the county, if the convicts can be made to work. As the number increases the proportion of pro-

fit becomes greater. We have seen some very handsome specimens of ore containing gold, silver, lead and copper, from a mine in Cabarrus county, adjoining the celebrated Reed Mine from which the nugget of twenty-eight pounds was taken-the argest ever found in the South, and almost equal to any in the world. The vein is eight inches thick at the surface, increasing to three feet at the depth of forty feet, and the stratta through which it passes are very favorable for antici-pating increase in both the size and richness of the lode.—Char. desiers, who make it their business to buy up second-hand instruments, and, after retouching them, advertise them as new, at seemingly low prices, the imposition not being discovered until the instrument is paid for.

There are also Organ desiers advertising from New Jersey, claiming to be manufacturers, who, instead of manufacturing the instruments they advertise, purchase them from "Cheap John" makers, whose sole object is to sell. If any person wishes to be convinced of the above, I ask them, purely for their own benefit, to communicate with me, in whatever way they please, and I will freely undertake to supply all information needed, and they can then choose for themselves in purchasics.

AUTUMN.-September 1st on Monday last, and with it commenced the Autumn season. The heat and burden of the farmer's summer toils are about over, and he enjoys the prospect of good crops. Let us hope that nething in the shape of storm and flood will come to mar the bounteous corn crops which cover the rich bottoms along our creeks and the Yadkin river. Truly, we have cause to be grateful to God for the blessings showered down upon us this year. Let us see to it that we do not abuse these bounties.

We see notices that oranges and lemons are being grown in Chatham county. Salem has been noted for the growth of these fruits for the past forty years. Some of the trees are large and although grown in large tubs, bear exceedingly well. The fruit of the The freights on our Railroad for the lemon is fine, while the orange is small and month of August have been larger than not very palatable. Several years since an orange tree was full of ripe fruit about the Christmas holidays, and was used as a "Christmas tree." It was a beautiful sight.

Judging from the number of pigs we notice in the country, shoats will be plenty. The stock of hogs of A. N. Reich, H. Shoaf. Stafford and Shores, on the Salisbury road, and of Dempsey Baily, on the Lexington road, are very fine.

We are pleased to notice all improvements in the country, and we learn that off the public road, improvements in cattle, hogs, fowls, &c., are in progress.

Our farmers are also more particular in the care of their lands than formerly. MAGISTRATES' MEETING. - According to

By the decision of a late municipal election the hog law goes in force to-day. No more perkers allowed to range the streets. Last Friday and Saturday were general pigpen building days, and one man was still at work on Saturday night at 10 o'clock, by moonshine, to get his pen done, and to-day the streets are deserted. Of course this only applies to persons owning hogs in town. Country hogs are privileged to come and go when they please.

Tenement houses are in demand. The only building unoccupied is the Calaboose. It has been built three years and has never had a tenant yet; the reason is it was located in the neighborhood of the churches.

I heard a man make a sensible suggestion the other day, and that was that the Commissioners buy a lot of tools for the use of the incorporation, and make a tool-house of the Calaboose. One reason why we don't need a Calaboose is there is no liquor sold in the place. I heard one of our citizens say he was in a town not long ago, not half as large as this, that had three grog shops, and in one hour he counted fifteen men staggering along the streets; and when he mentioned it to the landlord of the tavern, 'Oh," he said, "that is nothing, we are used to it!"

HOTEL DI MILANO, ROME, My Dear Brethren :

Right in the heart of old Rome, a few hundred yards from the Pantheon, which I saw a couple hours ago in passing, I am now writing to you. For wherever I am, whether in famous cities or among the Alps, you are remembered and dear to me. Much s I have seen during these memorable weeks, the sight of home at Salem will rejoice me more than any other, and I shall count it a great occasion for thankfulness when I shall stand in what is more to me than the grand cathedrals of Italy, the Salem pulpit, and when I shall have my class gath-

ered about me again. I do not know where my last letter broke off, nor should I be able, though I wrote many letters to tell you all that I have seen. Hair Vigor,

For restoring Gray Hair to its natural Vitality and Color.

A dressing which is at once agreeable, healthy, and effectual for preserving the hair. Faded or gray hair is soon restored to its original color,

with the gloss and freshness of youth. Thin hair is thickened, falling hair checked, and baldness often, though not always, cured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed. But such as remain can be saved for usefulness by this application. Instead of fonling the hair with a pasty sediment, it will keep it clean and vigorous. Ita occasional use will prevent the hair from turning gray or falling off, and consequently prevent baldness. Free from those deleterious substances which make some preparations dangerous, and injurious to the hair, the Vigor can only benefit but not harm it. If wanted merely for a

### FOR THE FARMER'S HOUSEHOLD.

Hay Curing.

It is wholly unnecessary to depend upon scientific analysis to determine the comparative feeding values of hay cut animal from choice, takes with apparent relish, hay, that not only is cut when dried, but is additionally dried before coming to the mow, and without any fragrance whatever, in preference to hay that is cut while yet filled with the rich juices of the grass, not so intensely dried but that it will hold some of its freshness, and comes from the mow with a 'sweet perfume,' there will be an

argument for late cut hay.
We have always been favorable to early cut hay, and have been gratified in observing the force of example as it has developed itself in a disposition to cut hay much earlier than formerly. It should be the aim of farmers to avoid, as much as possible, all errors, and we believe that none are more disastrous than letting grass stand too long before cutting, and drying it too much after it

In order to secure the best hay crop the cutting should commence about the time, or just before the grass comes into blossom; it is then presumed to pos-sess a maximum of nutritious principles, and while in this particular condition it requires more care in the curing than fully matured grass, the error of overcuring should not be fallen into. The great thing to be avoided in curing hay, is the presence of any external moisture, which will tend to make the hay moldy and musty. With all the ex-ternal moisture dried out and the hay thoroughly wilted and carted to the mow while yet hot, there will be no danger but that the hay will come out in winter possessed of a rich aroma that will serve to tempt the appetite of the animals before which it is placed.

Hay placed in a mow in this manner will settle and compress itself, and will seem to retain its flexibility in distinction from such as is dried so as to lie loose like straw and appear coarse and brittle, much to the disgust of the animals that are expected to eat it .- Mary-

Shade for Sheep

A perfect sheep range implies plenty of shade at some airy point where the flock can, after feeding through the cooler hours of the earlier day, resort to escape the burning rays of the summer In permanent pastures such shade can be had by planting trees where they do not naturally exist. Temporary shelters may be economically constructed from boards laid flat upon posts six to eight feet high, where timber is remote, or by throwing boughs and brush upon a rude framework of forks and poles, where these can be easily secured. Sheep, as eagerly as man, seek shade when the heat becomes oppressive; and to deprive them of its enjoyment is neither economical nor merciful. Like many other good things of life, this matter of shade for sheep may be abused, if not carefully looked after by the flock-master. In excessively hot weather, the flock may spend more time than necessary in the coveted shade. If such the resting place, and by somewhat scattering the animals, turn their attened, and the ground turned over by plowing—thus bringing the cooler and purer soil in contact with the feet and ordies of the sheep. The expenditure of the few hours per week, and the small necessary outlay of money involved in the above suggestions, will come back more than four-fold in dollars and cents to him who will act upon them,

One rarely considers that a well-kept cat may be more profitable than a cow. If one rat per day is destroyed, the services of the cat may be estimated as at least equal to \$100 per year. Let us try to calculate the enormous damage done by 365 rats in one year, to say nothing of the ravages of the numerous progeny of so many vermin. One rat per day is a moderate amount of business for an active cat. Recently the writer counted five rats cantured in a will lean over and short. Were received to the most remarkable sights ever seen at a horse race is the picture of 'Tom' and his driver in the heat of a race. When kept free from hunger a cat will watch more patiently, and will only occasionally devour a rat or a mouse. The mainder of the story. most healthful food for a cat is a mixed animal and vegetable diet. Milk and bread; a few potatoes with meat gravy, or a little fat, and a sprinkling of salt, with an occasional scrap of meat, are excellent food, and will keep the animal in good health. A farm can usually support four or five cats profitably, and these should be chiefly male, and the majority of these should be castrated.

Bone for Fowls. Ground bone or bone-meal is an ingredient whose value as a mixture in poultry feed has no equal for its cost. The different modes in which this article is put up nowadays, for ordinary

that renders it a cheap commodity, and fowls are very fond of it. Bone-meal is finer ground, and may be mixed with corn or wheat-meal, steamed or scaled, to great advantage for young chickens. For laying hens it is an admirable stimulant, and those who have not used it will very quickly discover the difference in the production of eggs by giving it a trial. It is surprising with what avidity fowls will devour this substance,

GREEN CORN PUDDING.-Twelve ear of green corn, grated, one quart of sweet milk, three tablespeonfuls of butter, three of sugar and three of eggs; bake in a buttered dish until it begins to thicken, then it is done; put the but-ter in last on top and it will bake nice and brown. BARED MACARONI. - Lay a quart bowl-

ful of macaroni in cold water and let it soak half an hour; then put it into a deep baking dish; add one pint of rich milk, one-quarter of a pound of butter, one teaspoonful salt. Cut the macaron in small pieces and grate plenty of cheese over the top. Bake a light brown.

GINGER SNAPS. - Take two eggs, one cup brown sugar, two cups molasses, one cup heaping full of lard, little salt: beat well together; set upon the stove until it boils; add two tablespoonfuls each ginger and soda, covered with four in and out of season; any healthy animal will solve the question without the aid of laboratory exercise, and whenever an and roll thin for snaps. AMMONIA IN THE KITCHEN. - The pantry shelves are getting grimy, or fingermarks around the doorlatches and knobs are looking dark and unsightly. For lack of time, they are left day after day, for it is hard work to scour all the time, and it wears off the paint, too. The husband keeps his bottle of oil, or perhaps a large can holds it, for he never stints in that. Now, suppose his wife has her bottle of spirits of ammonia to use; she takes her bottle of water and a clean cloth, just puts on a few drops of the fluid and wipes off all the dirt; it is worth more than a half-day's labor, and does not hurt the paint either. She could put a few drops in her dishwater, and see how easily the dishes could be cleaned; a few drops on a sponge would clean all the windows in the sittingroom, making them shine like crystal. It would take the stains off the teaspoons, too; and a teaspoonful in the mop-pail would do more toward wash up the kitchen floor than ten pounds of elbow-grease applied to the mop handle. A housewife has just as much right to make her work easy and expeditious as her husband. If she does not do it the fault is her own, in a great

A Distinction to be Made.

New York papers advertise 'Alpaca swallow-tail coats for waiters from \$2 up.' This sort of coat supplies a want long felt. It has been the custom heretofore to dress waiters at parties in faultless broadcloth, white neckties, and in all respects like the society young man. This confusion of uniforms has led to serious mistakes on the part of good, honest souls from the country, for, unless one could judge from the intellect, amount of intelligence or signs of use-fulness displayed, it has been hard to distinguish men who pass for waiters at parties from numbers of youthful persons who pass for gentlemen at the same places. To say the least, it is very inclination is evinced, let the shepherd, awkward to order a guest to bring you at the proper time, walk quietly about a glass of water, or to ask a waiter to sit down by you and engage him in familiar conversation. > A Wonderful Horse. 'Sleepy Tom,' the dark bay pacing horse, went around the mile track in Chicago in 2.124, the fastest mile time ever made by any trotter or pacer in the world. "Tom" is blind as a bat, is about fourteen years old, fifteen hands high, and has afforded as much amusement to turfmen as any other animal in America to-day. One of the most rethe old horse seems to understand and

The Last Great Zulu Fight,

correspondent accompanying the lish troops in Zululand, gives an unt of the battle which resulted in the downfall of Oetewayo and the supre macy of the British in that campaign. The advance was made with about 4,000 troops and the formation a hollow square. Inside, ready for action, were the artillery, the engineers, the natives. The Zulus kept well in the background. We had passed the Nonjueno kraal, and all was quiet as yet. The enemy was visible in one considerable straggling column, moving parallel with us. Another was crowning and descending the eminence on the left rear, toward Nondjueno. Another was visible fitfully in various directions on our left. A fourth great mass was moving down on the right from Ulundi. It was impossible to tell how many lay in the dongas on and about the direct front. Buller was continually stirring them up, and a brisk fire was exchanged. Presently the ground marked down by Buller, an open plain, was reached, and the British awaited the foe, who, by this time, showed in overwhelming numbers in all directions. The Zulus began to close The British position was surrounded with a ring of fire, Colonel Buller galloped back into the

square, which was similar in form and construction to the famous squares of Quantre Bras and Waterloo. By this ame the guns were in full action, and the guns only. They did not check the Zulu advance though the practice was excellent. Now the infantry opened on all sides, and the Zulus discharged their pieces, but were evidently bent on making that rush to close quarters in which mere weight of numbers counts enor-mously, even against the best skill and luck. On they came, staggered now and then by the hail of bullets which the infantry poured into them. It was believed that Cetewayo himself was looking on the fight and every Zulu fought like six; fought, poor wretches, against a storm of fire. They dashed themselves at the British on all sides of the square. The enemy wavered, they gave way, they broke into disorder. Then, with a cheer that rose above the storm of shot and shell, the square opened for the first time; it opened to let out the Seventeenth Lancers, and Buller's Horse, who fell upon the retreating enemy like 'avenging thunderbolts from the blazing throne of Jupiter.'

The Lancers did fearful execution, though they lost several men in the hand-to-hand fighting that ensued. Some of the men slew their half dozen Zulus each. Quarter was neither asked nor given. When the pursuit was stopped, some 800 to 1,000 Zulus had bitten the dust; and the British counted up their own losses of ten killed and fifty wounded, some fatally, while the king's kraal was blazing, and the other military kraals were fired by bodies of British troops.

Couldn't Help Her.

The gates at the passenger depots which shut out all people not baving tickets for the trains were yesterday closed at the Union depot against an elderly woman wearing spectacles and using an umbrella for a cane. 'Can't pass without a ticket,' said the

She gave the old umbrella a whirl and brought it down on his head with all the vim of an old-fashioned log-raising, and as he staggered aside she passed him and

'There's my ticket, sir, and I've got more behind it! Mebbe one man and a gate can stop me from sending word to my darter to grease the baby's nose with mutton taller if the weather changes cold, but I don't believe it!'

And she walked down to the train, found some one going to Port Huron, and came back humming the melody of 'The Three Blind Mice.'—Free Press.

Worthy Co-operation.

A writer in Harper's Magazine for September gives an interesting account of an excellent co-operative plan in suctown of Mulhausen, France, whereby easier. He says : In 1866 the first set of rules for an association formed bethe following provisions: It embraced all the women working in the establishments, aged between eighteen and fortyfive years, who paid every fortnight three cents, the firms paying the same midwives and nurses for those of the women who needed them. A woman, to be entitled to this assistance, must have been in the employ of the firm at least ten consecutive months, and have paid her monthly dues. A fit of sickness did not deprive her of her right, if it was certified to by a physician. Every woman giving birth to a child is paid a sum of fifty-four francs (\$11), payable in three equal payments a fortnight apart, counting from the day of the birth, with the understanding that she abstains from work for six weeks and devotes herself to the care of her child. Other establishments which have not oined this association bear themselves the expenses of the physician, the mid-wife, the nurse and the full wages of the mother for four weeks from the time of

The Fashions.

Gold jewelry should not be worn with ream color, and silver looks like tin by contrast with it. Felt bonnets and round hats will be

orn again in the fall, notwithstanding the suggestion that they were losing favor last year.

At Saratoga one lady is said to possess twenty parasols, each one of which was made to order after her costumes were completed. Real point lace is white when new:

in the paniers. Shirring is becoming very popular and many new costumes are seen with the front and back of the basque or poonaise shirred. These dresses are only becoming to slender figures.

Dauphin gray is a new shade of silk that will be worn in the autumn. It has yellowish tinge, not so deep as that of old gold, and will be contrasted with myrtle green and with wine color.

Embroidery runs riot on summer toilettes for every part of the day. In the autumn it will be even more fashionable, as it is more effective when done on heavy cloth. Owing to its great expense it can never become common.

A pretty bracelet is a pair of clasped hands in gold, a ring on the finger of each hand being set with a gem. It has some delicate motto inside referring to unchanging friendship, 'auld lang syne,' or something equally affecting.

The shape of ribbon bows has changed completely. They are no longer made with stiff loops and ends, but merely with very long loops, consequently very supple, and without any ends at all. These bows are placed on the front of dresses, and are used to simulate or conceal pockets.

Bands of printed chintz are used to trim the cashmere dresses which French milliners are making for the autumn. These gowns have the skirts arranged in kilt plaits at the back and finished in front with two deep kiltplaited flounces. The bands of chintz border the plaitings and also the tunic.

Harper's Bazar says: Wide belts of voven canvas fastened with leather buckles are the novelty for country toilettes. Some of these are four and a half inches wide, are made of white canvas, and are fastened by three small buckles and straps of leather; others are only two inches broad. To the left side is attached a square white canvas bag, and the whole is very effective with blue, black, or green dresses.

Perilons Road Building in California. As the construction train that runs between Fairfield and Benicia was engaged in hauling gravel for ballast on the road, it met with a narrow escape from being engulfed in the bowels of the earth with all the train hands on board, A short distance out of Benicia, and beyond Government Point, is a piece of tule land that, when the road was being t in a short time, even

night, it appeared as if some unseen power was underneath the ground, who would open a vast trap door and out of sight the whole amount of earth would

At last it appeared as if human energies and skill had successfully combatted with and overcome the unseen power. The road was ballasted and track finally laid, and the railroad authorities were secretly smiling at the thought of having their road in good working order by the course of September. A few final touches were required on the road in the shape of gravel and earth; so the construction train, under the supervision of Engineer Sankey, of South Valejo, was brought into requisition, and had been running back and forth between the two stations meantime with

apparent safety. Saturday, upon approaching the place, which is known as the Bottomless Pit, the engineer noticed the earth having depressed appearance, but he was so far advanced that it was impossible for him stop, and, having on a powerful head of steam, he opened the valve and went rushing over the dangerous place, and at the same time felt the ground settling under the train. In a moment, almost, they were over the morass, and upon checking the engine the men on the train looked back, and for a distance of over three hundred feet they saw the ground, the ties and the track, in one vast body, sink down into the bottomless pit to a distance of fifty feet.

Mythology Modernized. The Norristown Herald thus caustically served up the ancient myth regardtween seven manufacturing firms made ing Nemesis: When she was little she was called 'sis,' without the Neme. She was the goddess of punishment—the terror of all evil-doers, tracking every crime to its door, or alley gate, as the three cents, the firms paying the same case might be. When the cashier of the sum for each woman in their employ, to First National bank of Olympus approform a fund for providing physicians, priated \$50,000 of the bank's funds and skipped to Switzerland to drink in the beauties of the mountain scenery and grow up with the country, Nemesis jumped into her car, whipped up her team of gryphons and speedily overtook the offender. She discovered the Manhattan bank burglars, but she is mighty dilatory in getting on the track of the Stewart grave robbers. The fact is, the avenging Nemesis of modern days is a miserable failure. The man who embezzles \$75,000, if ever overtaken by her, is awarded a few months' imprisonment, while the man who abducts a ham to feed his starving family is quickly grasped by the modern Nemesis and sent up for three years. She is alto-gether too lopsided in her manner of wreaking vengeance. As long as the eliptomaniae newspaper man is per-mitted to thrive and wear better clothes than the journalist from whom he pilfers, we shall conclude that Nemesis is either dead, or has espoused the cause of the women's rights advocates, and has no time to devote to the avenging

Heavy Forfeit for Marrying. Phineas Hough, of Philadelphia, who died several years ago, left a house and lot in that city, with all its furniture, and also the interest of \$20,000, to his wife, Elizabeth Lynn Hough, for life, if she should so long remain his widow, but in case of her marriage then the estate was to go to the testator's father. The Best Remedy Known to Man! Dr. Clark Johnson having associated himself ith Mr. Edwin Eastman, an escaped captive, long with Mr. Edwin Eastman, an escaped captive, long a slave to Wakametkla, the medicine man of the Comanches, is now prepared to lend his aid in the introduction of the wonderful remedy of that tribe. The experience of Mr. Eastman being similar to that of Mrs. Chas. Jones and son, of Washington Co. Iowa, an account of whose sufferings were thrillingly narrated in the Mrs. Pork Head of Dec. 15th, 1878, the facts of which are so widely known, and so pearly parallel, that but little meation of Mr. Eastman's experiences will be given here. They are, however, published in a neat volume of 300 pages, entitled, "Seven and Nine Years Among the Comanches and Apaches," of which mention will be made hereafter. Buffice it to say that for several years, Mr. Eastman while a captive, was compelled to gather the roots, gums, arks, here's and berries of which Wakametkla's medicine was made, and is still prepared to provided. medicine was made, and is still prepared to vide the same materials for the successful i faction of the medicine to the world, and
